**Lights All Around Us**  
**Pre-session: Activity Sheet One**

So you see light all around you. In your group brainstorm a list of 10 things that light up, where they are located, what you think makes them light up, and a rank sheet from 1-10 of their brightness.

| Source of Light | Location of Light | What makes it light up? | Rank the lights brightness from 1-10. |
|-----------------|-------------------|-------------------------|---------------------------------------|
| 1.              |                   |                         |                                       |
| 2.              |                   |                         |                                       |
| 3.              |                   |                         |                                       |
| 4.              |                   |                         |                                       |
| 5.              |                   |                         |                                       |
| 6.              |                   |                         |                                       |
| 7.              |                   |                         |                                       |
| 8.              |                   |                         |                                       |
| 9.              |                   |                         |                                       |
| 10.             |                   |                         |                                       |

**What did you notice?** : Write two sentences summarizing the sources of energy for all these different light. \_\_\_\_\_
